ENGINEERED FLOORING

SLCC has curated a thoughtful collection of engineered hardwoods designed to bring elegance, sophistication, and nature to any space. Utilizing the very best in manufacturing processes combined with attention to detail, features, and benefits, SLCC's engineered hardwoods are engineered to last. Through a steady examination of design trends, SLCC produces products to match the wants and needs of today's customer.

Villa

Beauty is in the details, such as the hand dyeing process used in the creation of our Villa Collection hardwood flooring. Unlike a machine dye process, hand dyeing creates an unmatched aesthetic by accentuating the naturally occurring subtle shade variations found in each wood species for a truer representation of their unique beauty. Hand dyeing adds a distinct elegance and beauty that provides an upscale look to any space and décor.

SOLID FLOORING

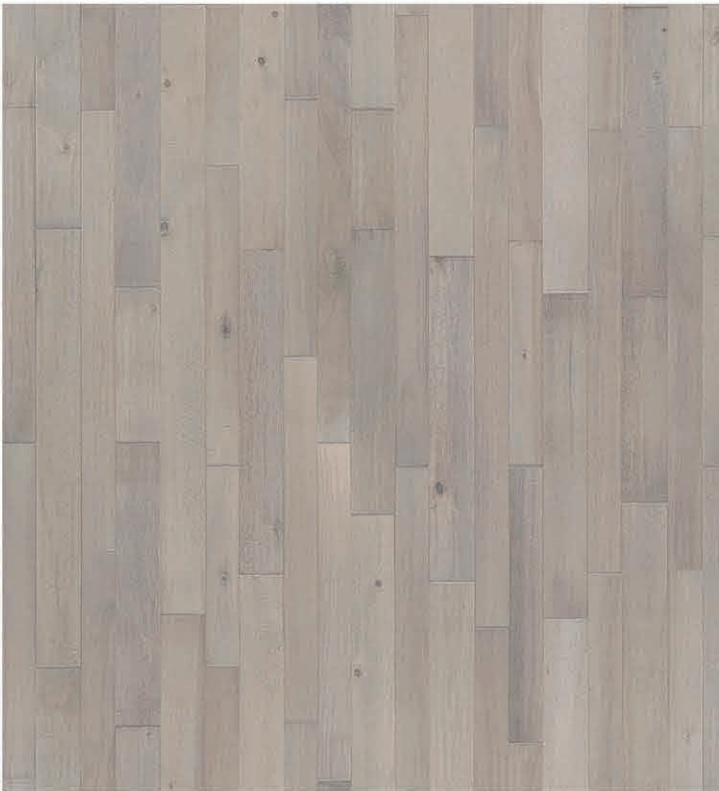

Bring the beauty and essence of nature inside with SLCC's authentic collection of solid hardwood. Thoughtful consideration was brought to every species and color selected to comprise the collection. Modern color palettes, sophisticated grain patterns, and contemporary plank widths allows SLCC's hardwood collection to deliver beauty and nature's elegance to any space.

Solid

Solid wood flooring offers a unique upscale look that is unmatched, representing the natural beautiful grains and textures inherent to each wood species from the Creator's handiwork. The Solids Collection offers a variety of textures, widths, and staining processes used to enhance the natural look of the Oak, Birch, Mahogany, and Acacia species.

SLCC Flooring

ENGINEERED FLOORING

From our highest quality Villa Collection to our value minded Pacific Coast Collection, we use the same strict quality control standards in both the selection and manufacturing of each species. Every wood species offered by SLCC, including European Oak, North American Maple, Hickory, and Acacia is selected for their grade, thickness, length, and width profiles. This selection process allows us to offer a greater variety in both style and budget options.

West Winds

The West Winds engineered hardwood collection from SLCC blends the richness and brilliance of natural hardwood with family-friendly affordability. The collection offers an array of species and finishes to satisfy the need for uniqueness for any space. Subtle scraped surfaces offer more character and rustic feel, where the matte, brushed finishes with long plank lengths deliver a more modern feel that today's customer is seeking.

PRIME SPECIMENS COLLECTION

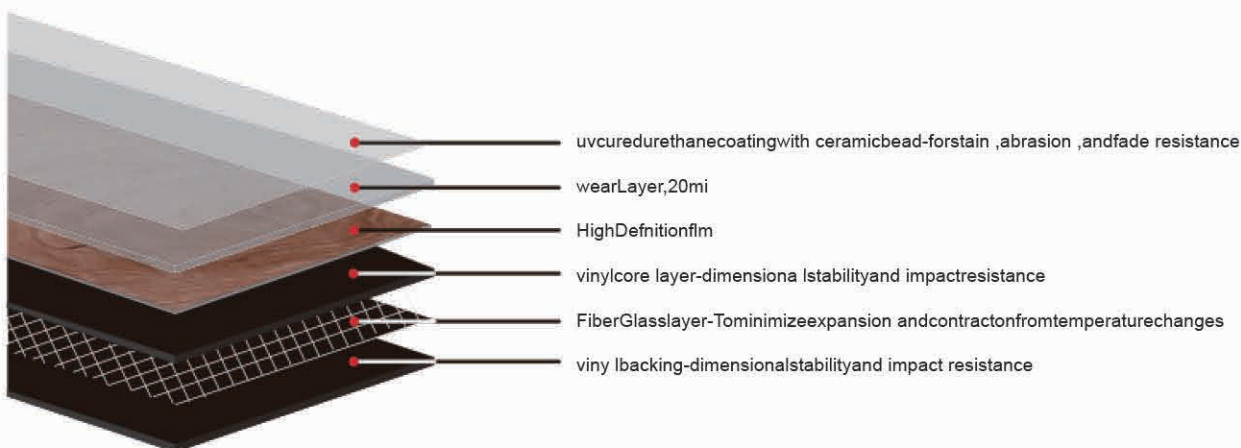

Like art imitating reality, **Prime Specimens Collection** captures the essence of three different surfaces, with a modern flair. Whether it be the characteristic graining of oak and maple species wood, or the subtle pattern and shade variations of concrete, or the distinct veining of marble stone, Prime Specimen's modern interpretation brings a fresh look to common surfaces. From the clean modern look of **SLEEK WOODS** to the industrial styling of **CREME DE LA CRETE** or the wide plank format of **MODERN MARBLE**, this exciting new collection is sure to collaborate with a multitude of finishes in any space. Old things become new again with **Prime Specimens Collection**.
